Dear Nova:

I am very saddened to learn of the closing of the West of the River Community Health Center; all of your hard work and your selfless efforts certainly deserve more than this result.

I wish that there had been something that I could have done to help keep you afloat. Evidently we fought a losing battle, but I hope that in better economic times you find the opportunity and motivation to try once again.

If there is any way that I can be helpful, or any assistance that I can provide, please let me know. In the meantime, please accept my appreciation for all that you've tried to do in our community.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Barbara'.

Re: Nova Clite

Dear Madam/Sir:

I have known Nova Clite since 1975 and have worked closely with her during the period that she was with the Task Force on Battered Women. At that time I was an active member of the Task Force and an attorney with the Family Law Section of Legal Action of Wisconsin, Inc. While the creation and growth of the Task Force on Battered Women and the development of a shelter for battered women was the result of the work of many, Ms. Clite is the person most responsible for these accomplishments. She took an idea, researched it, presented it to the community, brought together others to implement it, obtained funding for staff and programs and co-ordinated other functions. In addition, she was providing advocacy for individual battered women at the same time.

My experience in working with Ms. Clite was satisfying and enjoyable. She was responsible and well-prepared so that discussions and meetings were focused and productive. She was well-organized and conscientious. She attended to daily responsibilities without losing sight of the overall goal. She worked extremely well with others and was particularly good at motivating and keeping volunteers with the Task Force.

I hope this has been helpful. If you would like any additional information regarding Ms. Clite, please feel free to contact me.

Very truly yours,
